Profile

Final-year B.Sc. Computer Science student at HIT – Holon Institute of Technology, with experience in Backend development using Node.js and NestJS while working with MongoDB. Strong foundation in software development, including OOP, REST APIs, Git, Docker, and databases. Seeking to join a software development team.

Projects

TraderNet – Social Network for Traders (Node.js, Express, MongoDB, React Native)

Developed a social network for stock market traders. Implemented REST APIs for user and post management, JWT-based authentication, MongoDB integration, and a client-server architecture.

Scanners Management System (NestJS, React, MongoDB, Docker, Redis)

Developed REST APIs, implemented JWT authentication, integrated Azure Blob Storage, and worked with MongoDB, Docker, and Redis as part of a development team.

Professional Experience

Android Lecturer & Private Tutor, TopEdu

SEPT 2025 – PRESENT

- Teaching Android application development in Java to high school students.
- Providing in-depth explanations of the Activity lifecycle and application architecture.
- Preparing students for Ministry of Education assessments and exams.

Programming Instructor, LeadersApp

NOV 2023 – AUG 2024

- Taught introductory and advanced Computer Science topics.
- Instructed Java and C# with a strong emphasis on OOP principles.
- Built strong programming fundamentals and logical thinking skills.

Military Service – Network & Communications Technician, Hoshen Unit

OCT 2020 – SEPT 2023

- Operated and maintained secure communication systems in a classified environment.
- Worked with advanced networking platforms and cloud-based infrastructure.
- Collaborated with senior headquarters personnel and supported critical operational processes.

Education

B.Sc. in Computer Science, HIT – Holon Institute of Technology

2026

(Expected Graduation: 2026)

Node.js & JavaScript, iNT College

Technological Reserve Program, ORT Rehovot College
